

B757 and Bob Dylan Scandinavian Tour Largest Aircraft Landing in Odense Denmark since WWII

Email from Airport Manager Erry I. Knudsen

Here is the local Danish newspaper covering mostly Funen where Bob Dylan was this week.

But for me was it your plane. I have looked forward many weeks to see this big plane here. Before the largest was only B737-200 and last year also a B737-800. I was very proud seeing the B757 here and how many people were looking at the airport during the visit.

We were very proud having N801DM as the biggest plane since World War II when the Germans first built the airport in Odense. During the past 6 year I have extended the runway 2 times so we are able to receive this size plane.

We found it very surprising it was also so nice inside. The biggest plane was also very attractive for the press so I was busy most of the time the plane was here.

Today I received some pages from the news as I have promised the MLW Air crew.
